

FLUTTER PRODUCT CASE STUDY

FamilySufrah

Arabic-first food marketplace and delivery ecosystem

A production Flutter platform delivered across customer, provider, and delivery-delegate applications from a shared product foundation.

ROLE & CONTRIBUTION

Flutter product engineering across localized UI, marketplace flows, platform integrations, and release-ready mobile delivery.

PRODUCT CAPABILITIES

- Multi-app product flavors
- Cart, checkout, and order tracking
- Provider inventory and delegate workflows
- Wallet, maps, FCM, Remote Config, and RTL
