🛡 Completed 🔗 Portfolio

Profile

Flutter Developer with 3+ years of experience building and shipping production Android and iOS applications. Strong in Dart, Clean Architecture, and BLoC/Cubit, with hands-on experience in Firebase, REST APIs, multi-flavor applications, real-time features, and mobile store releases. Comfortable owning features from architecture and implementation through deployment, performance optimization, and production support.

Professional Experience

Flutter Developer (full-time) at ICRAFTSA

2025 Mar – Present
Mansoura, Egypt

- Configured Firebase Remote Config and Cloud Messaging across 4 production platforms for dynamic configuration, feature control, and targeted push notifications.
- Built real-time chat, deep links, payment workflows, secure storage, localization, and role-based workflows across 7 Flutter application variants.
- Maintained consistent Clean Architecture, BLoC/Cubit, complex RESTful API integrations, and reusable modules across 4 independently branded platforms.
- Managed end-to-end Android and iOS releases for 7 application variants, including signing, store deployment, production debugging, and post-release support.

Flutter Developer (full-time) at AAIT

2023 Mar –
2025 Mar
Mansoura, Egypt

- Built, optimized, and maintained scalable Flutter applications using Clean Architecture and BLoC while integrating 15+ RESTful APIs and third-party services, reducing response latency by 30% and minimizing UI rebuilds.
- Created reusable widget systems that improved development speed by 25%, supporting on-schedule production releases through collaboration with backend and UI/UX teams.

Flutter Developer (Part-time) at Algoriza

2022 Jul – 2022 Sep
Nasr City, Egypt

- Refactored a legacy codebase, reducing crash rate by 40% and improving app performance by 25%.
- Resolved production issues affecting 1,000+ users while establishing structured architecture and modular components to improve maintainability.
- Optimized API consumption and caching strategies, reducing redundant network calls by 35% and improving app responsiveness.

Flutter Developer at Techunique

2021 Sep –
2022 Mar
Zagazig, Egypt

- Developed responsive, accessible Flutter interfaces, applied scalable state-management solutions, and created a reusable component library that accelerated feature development by 20% across multiple projects.

Flutter Developer (Part-time) at Artronix

- Supported 10K+ active users by integrating Firebase Authentication, Firestore, FCM, real-time data synchronization, push notifications, Google Maps, and payment gateways.

2020 Mar –
2020 Jul
Nasr City, Egypt

Education

Bachelor of Computer Science – Higher Technological Institute, HTI

2019 Sep – 2022 Jul
10th of Ramadan
City, Egypt

- Grade: Good
- Graduation Project: Excellent

Projects

FamilySufrah , Food Marketplace & Delivery Platform

- An Arabic-first food marketplace and delivery platform delivered as customer, provider, and delivery-delegate Flutter applications from one shared codebase using product flavors.
- Built cart and checkout, order tracking, provider inventory and order management, delegate workflows, wallet, Google Maps, Firebase Cloud Messaging, Remote Config, and RTL localization.
- Available on Customer Google Play , Provider Google Play , Delivery Google Play , and App Store .

Mawahib AlSaudi , Talent & Academy Platform

- Two independently branded Flutter applications for talent discovery, academy registration, training programs, media feeds, payments, notifications, and real-time communication.
- Google Play: Academy App . App Store: Talent App  and Academy App .

Servena , Sports Booking Platform

- A sports platform for field discovery and booking, match and training management, payments, real-time chat, rankings, and notifications.
- Available on Google Play  and App Store .

Basiet Educational , E-learning Application

- An Arabic-first e-learning application covering course discovery, video and PDF lessons, exams, certificates, notifications, and student account management.
- Available on Google Play  and App Store .

2days

- A peer-to-peer rental marketplace application that connects renters and owners through a map-based system with distance tracking between users. The platform provides secure payment solutions and electronic agreements to ensure smooth and reliable transactions.
- The application serves users across Saudi Arabia, enabling individuals to rent or list items such as electronics, furniture, home furnishings, equipment, tools, services, and more.
- Available on Google Play  and App Store .

ATHATHE

- A furniture marketplace application connecting buyers and sellers through product discovery, category browsing, inventory presentation, and secure purchase workflows.
- Delivered responsive Flutter UI, RESTful API integration, state management, and production store release support.
- Available on Google Play  and App Store .

Mumaken [↗](#)

- A mobility enablement platform designed to empower individuals seeking to work in ride-hailing applications. The platform provides access to low-cost rental vehicles of the user's choice, with unlimited mileage, vehicle insurance coverage, and no upfront payment requirements.
- The application also facilitates direct registration with ride-hailing platforms and delivers comprehensive operational support, enabling users to start working immediately and generate income efficiently.
- Available on Google Play [↗](#) and App Store [↗](#).

Skills

Programming Languages: Dart (OOP, asynchronous programming, null safety), Kotlin, Java, Python

Architecture & Design: Clean Architecture, MVVM, MVC, MVP, SOLID Principles, Dependency Injection, layered design, separation of concerns, maintainability, modularity, testability

Version Control: Git, GitHub, GitLab, Bitbucket

Real-Time Communication: Socket.IO, SignalR, Real-Time Chat, Push Notifications

State Management: BLoC, Cubit, Provider, Hydrated BLoC

CI/CD & Deployment: GitHub Actions, Firebase App Distribution, Google Play Console, App Store Connect, Android and iOS releases, automated builds, delivery workflows

APIs & Integrations: RESTful APIs, Dio, HTTP, JSON, Postman, Google Maps, Payment Gateways, Deep Links, error handling, geolocation, routes, location-based features

Firebase, Testing & Code Quality: Firebase FCM, Remote Config, Authentication, Firestore, Unit Testing, Widget Testing, Flutter Analyze, Debugging, Secure Storage, Performance Optimization

Flutter: Cross-platform Android and iOS development

Flavors: Multi-environment and multi-brand app variants

Play Store: Android signing, releases, production publishing

App Store: iOS signing, TestFlight, App Store Connect

Huawei: AppGallery releases and distribution

Android: Gradle, permissions, signing, production releases, Kotlin platform integration, native configuration

Offline storage: Caching, secure storage, local persistence

Localization: Arabic, English, RTL support

Certificates

- Flutter Developer by Udemy [↗](#)
- Flutter Application Certifications in Algoriz [↗](#)
- Flutter Application Certifications in Techunike [↗](#)
